EARTHING RECEPTACLES

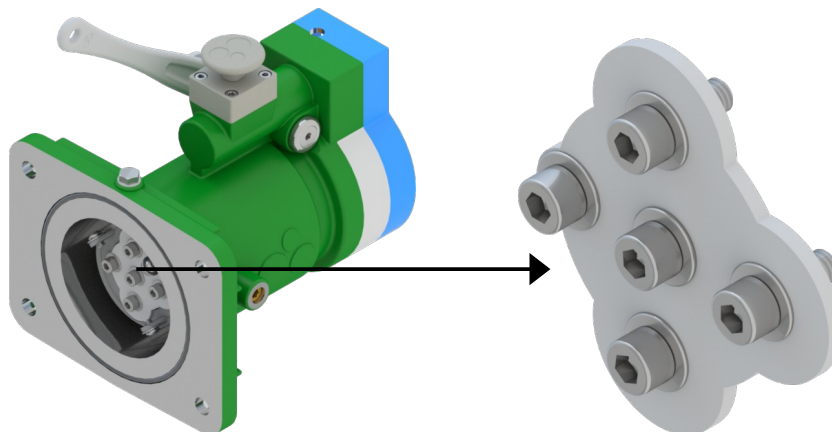

Product Range:	PES, PS, PL
Product Stock Code:	
Release Date:	19 th February 2026

Feature:

We are pleased to introduce our new Low Voltage Earthing Receptacles, purpose built for the demanding conditions of Australia's underground mining industry. Designed and tested to meet local and international electrical safety requirements, these units provide a dependable, compliant earthing point with a locking point for site electrical work.

Key Benefits:

- Delivers a safe, dependable earthing point that reduces electrical risk and ensures compliance with Australian underground mining electrical safety standards.
- A single integrated earthing plate connects all phases and the pilot pin directly to earth, eliminating the need for individual earthing wires that are more susceptible to damage and corrosion in harsh underground environments.
